

Trust the leading manufacturer

MECOTEC is a pioneer in the development of electrical refrigeration equipment and can draw on a wealth of experience over the company's 25-year history. By opting for cryochamber systems from MECOTEC, you're choosing TÜV-certified technology that sets the bar – and comes 100% from Germany.

MECOTEC is a place for specialists and team players alike. From research and development to manufacturing, sales and customer service, we work closely together towards a common goal: developing the very best ideas and offering the finest products.

With our two locations for development, production and logistics in Germany and our branches in Italy, France, the Middle East, the USA and Southeast Asia, we serve the needs of our clients worldwide.

Efficient and Economical

Whether used on sports injuries or rheumatic conditions, or alternatively to boost performance, a multi-chamber cryotherapy unit from MECOTEC will take you closer to your goal. In both top-flight sport and therapy, MECOTEC cryochambers with two or three chambers are ideal for use by up to four people at a time. And if you want to have your cryochamber tailored to your exact requirements – no problem! Our experienced engineers will be delighted to incorporate your specific requests in a customized model.

Benefits of sub-zero temperatures

In the cryo chamber, the human body responds to a temperature of down to -110°C. This may prompt the release of endorphins, activate the immune system, boost blood circulation and metabolism, detoxify cells, and activate healing processes. Thanks to whole-body cryotherapy, you can provide an effective, non-invasive form of treatment for all sorts of applications. Your pros of cryogenic usage are for example the following:

- Enhanced fitness
- Supported rehabilitation
- Reduced muscle-sore, pain and inflammation
- Higher energy level
- Improved regeneration
- Better lymphatic drainage and blood circulation
- Fewer wrinkles and cellulite
- Less fatigue
- Less stressors

Reasons for a cryoair double/triple

Nitrogen-free

Cooling in the **cryoair** double requires no nitrogen. This makes our technology safe, gentle and efficient.

Economical

Our innovative technology has been optimized over many years of research and is characterized by particularly low operating costs and highest reliability.

Competent

MECOTEC invented the electric cryo chamber, so you can rely on the expertise of our engineers – from planning and production in Germany to personal aftercare.

Flexibility

Request our customization options and have a system with up to three chambers installed.

Operability

It's child's play to use via the touchscreen on the terminal, Wi-Fi connection, cameras and intercom systems for safe, reliable and continuous operation.
